TABLE OF CONTENTS

01

ABOUT

From a corner in our founder's home, we started a firm that strives to lead by example. Since 2008, our firm has grown in leaps and is quickly becoming the recognized leader in turnkey CAD Drawing solutions for Fire and Security nationally.

02

SOLUTIONS

HelpGate® has a team that specializes in the security industry. Our bid drawings are specialized, our engineering is specialized, our drawings are specialized. We know our industry, we know your industry

03

EXPERTISE

A team of skilled CAD operators, highly trained electrical engineering graduates, NICET technicians and professional engineers with Certificates of Authorization in 44 states and decades of combined experience

04

COVERAGE

HelpGate® is portable. It goes with you to 44 states. This allows us to provide drawings that can be deployed in multiple sites at the same time. Customer service and project support available from 9:00 am to 8:00 pm EST.

05

EASY

HelpGate® is EASY to work with. We ask for everything upfront, give you an ETA, and done! We turned a highly specialized industry into a process that is predictable, quick, accurate, affordable and incredibly easy to work with..

06

COST-EFFECTIVE

Drawing errors, lack of expertise, inability to dial with AHJs, disorganization can delay the drawing submittal process. **HelpGate®** keeps you under budget with its expertise, its user-friendly process, and with its TIMELY deliveries!

07

CONTACT

HelpGate® is a people oriented company that makes a big difference in our industry: Predictable. Portable. Expert in its field. Easy to work with & Cost-effective Contact us today

ABOUT US

From a corner in our founder's home, we started a firm that strives to lead by example. Since 2008, our firm has grown in leaps and is quickly becoming the recognized leader in turnkey CAD Drawing solutions for Fire and Security nationally.

Strategically located in Miami, Florida, **HelpGate®** is a one-stop outsourcing provider of specialized CAD drawing packages for electronic security and fire alarm for national companies. Our services span from bid packages and proposal drawings to highly detailed engineering submittals. We strive to be the most resourceful and reliable company in our industry.

Our team is comprised of skilled AutoCAD operators, highly trained electrical engineering graduates, NICET certified technicians and professional engineers with Certificates of Authorization in 44 states. Our security and fire alarm teams have decades of experience in Fire Alarm, Access Control, CCTV, and Intrusion. Every client can be assured that a given project can be completed, supported and revisited even after years have gone by because of our strict internal production and document management processes.

- **BID SETS:** HelpGate® designs fire and security systems and produces bid packages including bid specifications, floor plans, device layouts, riser diagrams and detailed engineering in compliance with AHJ and applicable codes. These sets can be distributed among potential bidders and provides oversight to the bidding process up to recommendation.
- **PERMIT SETS:** A "Permit" set is a set of shop drawings customized to comply with minimum standards of local ordinances and adopted codes of a local AHJ in order to obtain an installation permit. Permit sets may require a signature and stamp by a Professional Engineer or a NICET certified technician in addition to the installer's license. Permit drawings are submitted to the AHJ which reviews the drawings and has the authority to approve or reject.
- **INSTALLATION SETS:** These are the sets that the installation team will use to perform the installation once the Permit Set has been approved. HelpGate® installation sets are highly detailed documents that include device location, wiring, wiring paths, elevations, point-to-point and riser diagrams, programming matrices, panel closets, etc. and customized drawings relevant to specific manufacturers. Our installation sets are preferred by highly trained technicians because of its clarity and ease of interpretation.
- **RECORD DRAWINGS:** Also known as "Certifying As-Built or Record Drawings," these are drawings professionally edited by a CAD Engineer utilizing "As-Built" drawings to show the condition of an installation at the time the documentation is signed, dated, and released by the installation contractor's representative.

SOLUTIONS

HelpGate® has a team that specializes in the security industry. Our bid drawings are specialized, our engineering is specialized, our drawings are specialized. We know our industry, we know your industry.

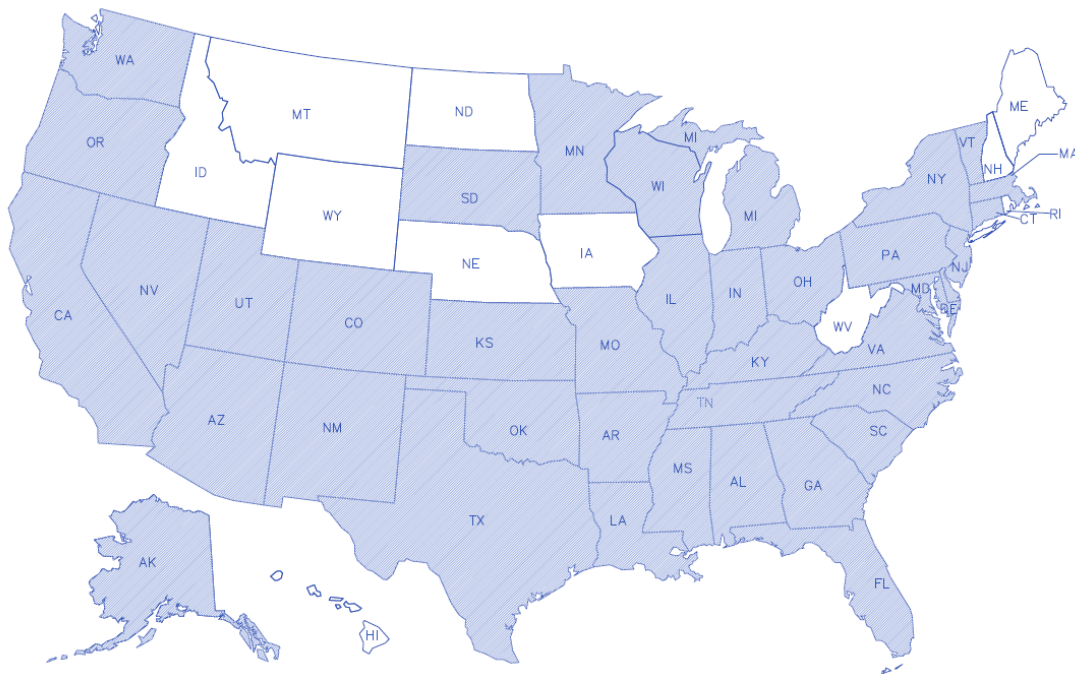

03

EXPERTISE

Our team is comprised of skilled AutoCAD operators, highly trained electrical engineering graduates, NICET certified technicians and professional engineers with Certificates of Authorization in 44 states. Our security and fire alarm teams have decades of experience in Fire Alarm, Access Control, CCTV, and Intrusion.

- **HelpGate®** is specially trained to meet compliance with the most stringent AHJ's in the country.
- **HelpGate®** is experienced in multi-story/multi-location, government/private, and high-security facilities such as educational and correctional facilities, international airports, and high-end commercial and manufacturing buildings throughout the entire U.S.
- **HelpGate®** has a very unique team of Professional Engineers with Certificate of Authorization in 44 states. All of our engineers are field and factory trained in most reputable fire and security equipment manufacturers.
- **HelpGate®** team designers must have a B.S. in Electrical Engineering and are continuously cross-trained in all disciplines.
- **HelpGate®** has decades of combined hands-on experience in preparing drawing sets in some of the most challenging and demanding environments including healthcare, technology and power utilities

COVERAGE

HelpGate® is portable because it specializes in producing solutions in 44 states. This coverage allows us to provide solutions that can be deployed in multiple sites at the same time. Our customer service and project support is available from 9:00 am to 8:00 pm EST.
